

Name _____

Pronunciation

Sometimes when Luke is reading his library book, he comes across a word that he is not sure how to pronounce. He has learned to use his dictionary to figure out the way to pronounce it. To do this he must first use the **Pronunciation Key**.

Look carefully at the key. Each symbol above the vowels represents a certain sound. The example word for each sound is a small word that Luke already knows how to pronounce.

Now look at the key and put the key words next to the word that matches the pronunciation symbols.
